

Air Conditioner Rebate for Cooperative Members

\$150
AIR CONDITIONER
REBATE

North Central Electric Cooperative is offering rebates to residential cooperative members who replace their existing central air-conditioning units with a new ENERGY STAR®-certified product*. This rebate is available only to residential members. Members must purchase and install a new ENERGY STAR-certified product within one year of the rebate request.

SPECIFIC REQUIREMENTS: ENERGY STAR®-certified air conditioning units (a maximum of two) with a minimum 16 SEER rating and a cap of 6 tons can qualify for up to a \$150 rebate per unit from North Central Electric Cooperative when purchased and installed at a location served by the cooperative.

Members are required to provide a copy of the purchase receipt and show proof that the product was installed in a home served by the cooperative.

Members must also include proof of ENERGY STAR certification, such as a copy of the yellow Energy Guide label or owner's manual (must include ENERGY STAR logo or statement of ENERGY STAR certification).

All rebates are issued in the form of a check. A maximum of two rebates per air-conditioning units, totaling \$300, may be paid per residential member home during the current program year.

*North Central Electric Cooperative's rebate on air conditioners is limited. The offer expires when funds are depleted on a first-come, first-served basis, or when the program is discontinued.
