

# Commercial & Industrial Energy Audit Rebate Program

UP TO  
**\$4,000**  
REBATE  
FOR  
COMMERCIAL/INDUSTRIAL  
ENERGY AUDITS

North Central Electric Cooperative's Commercial & Industrial Energy Audit Rebate Program offers business members funding for the completion of professional energy audits\*. Energy audits help identify potential areas for energy efficiency upgrades and can help save hundreds of dollars a year on electricity costs.

Additional rebates are available for businesses that install energy efficiency improvements recommended by the audit.

**SPECIFIC REQUIREMENTS:**  
Pre-approval of the project is required prior to the audit. Pre-approval is obtained through the submission of a completed application form. The application must include the contractor's detailed quote with the

project cost estimate. The proposed audit must be completed by a professional auditing or engineering firm and must include an audit of electricity use.

Once the audit has been completed, businesses must submit a copy of the auditing company's final invoice and the completed audit. A rebate of 50 percent of the total cost—up to a maximum of \$4,000 per audit—will be issued when all requirements have been met. Energy audit rebates are restricted to one audit per business facility within a five-year period.

\*North Central Electric Cooperative's rebate on commercial/industrial energy audits is limited. The offer expires when funds are depleted on a first-come, first-served basis, or when the program is discontinued.
