

Insulation & Air-Sealing Rebates for Cooperative Members

\$800
INSULATION
REBATE

\$400
AIR-SEALING
REBATE

North Central Electric Cooperative is offering rebates to cooperative members for the installation of insulation* and air sealing* in existing electrically heated residential homes. This rebate is available only to members. Upgrades must be completed within one year of the rebate request.

SPECIFIC REQUIREMENTS: Insulation and air-sealing upgrades must be installed by a licensed contractor. Do-it-yourself insulation

and air-sealing upgrade projects are not eligible for this rebate. All projects must comply with applicable federal, state, and local laws and building codes.

To meet insulation requirements, contractors must follow ENERGY STAR® guidelines. Minimum qualifying insulation R values are:

- Attic: R-38
- Walls: R-16
- Crawlspace/basement walls: R-10

A duct blast test is required for all duct-sealing upgrades, and a blower door test is required for all air-sealing projects.

Upgrades must be installed in an electrically heated residential home.

All rebates are issued in the form of a check. Only one application rebate per area per program year is permitted, with a lifetime maximum of two areas per home.

*North Central Electric Cooperative's rebate on insulation and air sealing is limited. The offer expires when funds are depleted on a first-come, first-served basis, or when the program is discontinued. New construction does not qualify.
