HOW TO STAY IN TOUCH

As your cooperative, it's our priority to make sure you stay as informed as possible with what's happening at NCE. We deliver information to you using several methods, so make sure you're following for all the latest co-op updates!

Ohio Cooperative Living Magazine:

Your monthly magazine that contains all of the official and legal communications from us, and so much more.

Between the Lines:

An opt-in monthly e-newsletter sent to members via email on the second Monday of every month. Sign up to receive this newsletter at

HELLO!

A NOTE FROM YOUR GENERAL MANAGER

Dear Member,

Welcome to North Central Electric Cooperative (NCE)! You might notice that we operate a little differently than you're used to in the coming months. That's because we're an electric cooperative - a not-for-profit corporation owned by the members we serve. Starting today, that's you!

Cooperatives put people before profits. Our services, programs, and policies are put in place in order to benefit our entire membership while keeping the cooperative strong. Our employees don't only work for the cooperative, they are also members of the same communities in which you live. On the following pages, you'll learn all about the set of principles NCE operates by, as well as how we give back to our members and communities throughout the year.

Members are also responsible for electing board representatives to serve on the NCE Board of Trustees. These trustees make important decisions, such as setting rates and the strategic direction of the co-op, with your best interest in mind.

We hope this handbook will help you understand the new benefits you have as an NCE member.

Edward J. VanHoose
General Manager

ABOUT US

A QUICK GLANCE AT WHO WE ARE

Year of Incorporation: **1936** | Power Supplier: **BUCKEYE POWER, INC.**

Total meters: **9,644** | Total members: **8,103** | Miles of power lines: **1,794**

Employees: **34** | Board of Trustees: **9 MEMBER-ELECTED TRUSTEES**

OUR STORY

The reason why we're different is the reason why we're here.

Under President Franklin D. Roosevelt, the Rural Electrification Administration (REA) was formed in 1935 to administer a program to encourage rural electrification by lending low-interest money to any group or company that would undertake the task. Even with the offer of low-interest financing, with a few exceptions, virtually all of the private electric companies chose not to get involved.

Instead, farmers decided to form cooperatives to do the job themselves.

On April 13, 1936, a group of Rural Electrification Association Committeemen from Hancock, Seneca, Wood and Wyandot counties met in Upper Sandusky, OH. Upon a motion made by Mr. Lewis Baldosser and a second by Mr. Paul O. Crum, the group voted to incorporate. Mr. L.B. Keller moved and Mr. Glenn Diller seconded that the name of the association be the North Central Farm Bureau Electric Cooperative -- now known as North Central Electric Cooperative. The motion passed unanimously.

Construction began in August 1937 and the first few miles of line were energized in March 1938. These few miles of line were able to provide electricity to a handful of member-owners. Since then, the cooperative has grown and its membership has become quite diverse.

Today, NCE is proud to serve eight counties and over 8,000 members on more than 1,700 miles of line.

THE SEVEN COOPERATIVE PRINCIPLES

HOW WE GUIDE OUR ACTIONS AS A CO-OP

VOLUNTARY AND OPEN MEMBERSHIP: Cooperatives are voluntary organizations, open to all persons able to use their services and willing to accept the responsibilities of membership without gender, social, racial, political, or religious discrimination.

DEMOCRATIC MEMBER CONTROL: Cooperatives are democratic organizations controlled by their members, who actively participate in setting their policies and making decisions. Men and women serving as elected representatives are accountable to the membership. Members have equal voting rights - one member, one vote.

MEMBERS' ECONOMIC PARTICIPATION: Members contribute equally to and democratically control the capital of the cooperative. The cooperative must maintain minimal margins each year to provide the internal equity financing necessary to maintain and improve the system. Any net savings achieved by the cooperative are assigned to members on the basis of their patronage. This money is eventually returned to the members in the form of patronage capital credits.

AUTONOMY AND INDEPENDENCE: Cooperatives are autonomous, self-help organizations controlled by their members. If we enter into agreements with other organizations or raise capital from external sources, we do so on terms that ensure democratic control by the members and maintain our cooperative autonomy.

EDUCATION, TRAINING, AND INFORMATION: Cooperatives provide education and training for their members, elected representatives, managers, and employees so they can contribute to the cooperative's development.

COOPERATION AMONG COOPERATIVE: Cooperatives serve members most effectively and strengthen the cooperative movement by working together through local, national, regional, and even international structures.

CONCERN FOR COMMUNITY: While focusing on members needs, cooperatives work for the sustainable development of their communities through policies accepted by their members.

SERVICE AREA

WHERE YOU CAN FIND US

NCE serves approximately 9,600 meters and 8,100 members in Crawford, Hancock, Huran, Richland, Sandusky, Seneca, Wood, and Wyandot counties in north central Ohio. The service territory is divided into seven districts.

DISTRICT COVERAGE

District 1: Crawford and Richland counties

District 2: Wyandot County

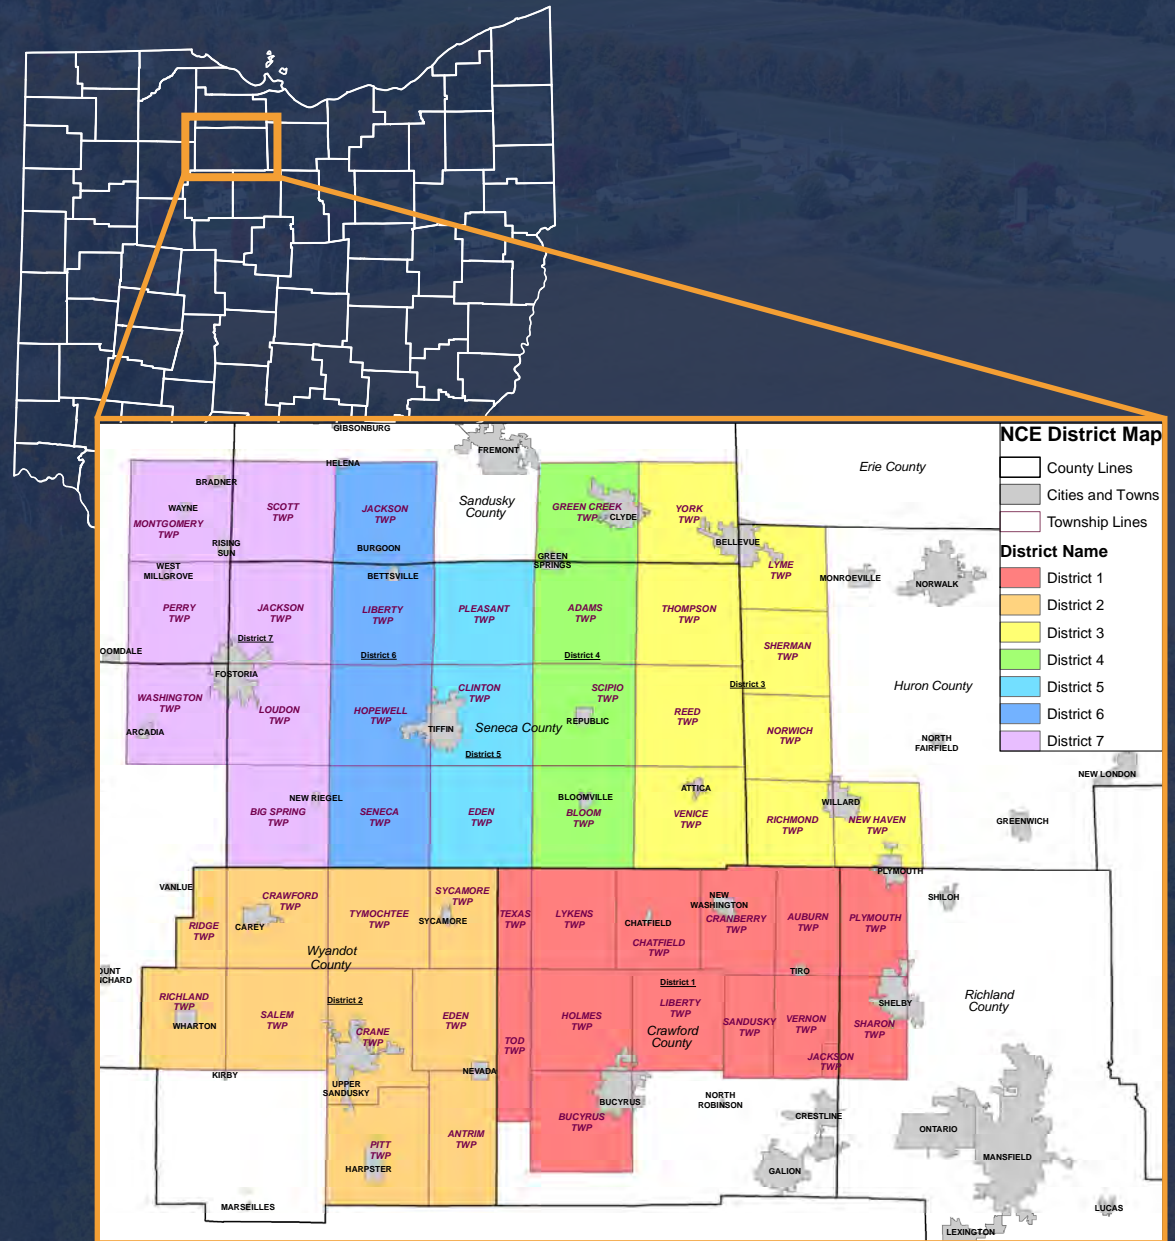

District 3: Lyme, New Haven, Norwich, Richmond, and Sherman townships in Huron County; York Township in Sandusky County; Thompson, Reed, and Venice townships in Seneca County

District 4: Green Creek Township in Sandusky County; Adams, Bloom, and Scipio townships in Seneca County

District 5: Clinton, Eden, and Pleasant townships in Seneca County

District 6: Hopewell, Liberty, and Seneca townships in Seneca County

District 7: Washington Township in Hancock County; Scott Township in Sandusky County; Big Spring, Jackson, and Loudon townships in Seneca County; Montgomery and Perry townships in Wood County.

THE BOARD

ELECTED TRUSTEES WHO REPRESENT YOU

NCE is governed by a board of nine members, democratically elected by their peers. This means they're members just like you, with the same desire to ensure the co-op keeps operating in the best interests of its members. Each board member serves a three-year term, after which they can run for re-election.

Voting takes place each year prior to the annual meeting if there is a contested election for the available district seat. According to the NCE Code of Regulations, uncontested elections (only one eligible candidate) do not need to hold a balloted election, and the sole candidate is automatically elected to the board.

If an election is necessary, official ballots will be mailed to all NCE members via a third-party election service. Votes can be cast by mail-in ballot or by voting online prior to the annual meeting where winners of the election will be announced.

At their monthly meetings, the NCE board of trustees review the financial state of the cooperative, discuss policies, evaluate new opportunities, and address issues the co-op may be facing. They are also responsible for representing the needs and interests of the entire membership, including setting the electric rates and creating the strategic direction of the co-op. These remain two of the board's most important duties.

A full list of current board members, plus contact information, is available at www.ncelec.org/board-trustees. Members are encouraged to voice any suggestions, ideas, or concerns to their board representatives.

HOW TO BECOME A TRUSTEE

Each January, the cooperative prepares trustee petition packets for the district seat that is up for election (three district seats each year, on a rotating, three-year cycle). Any member residing in one of those districts can pick up a packet within the petition timeframe and then must collect at least 25 valid member signatures from within their district.

After these signatures are confirmed by a cooperative employee, the member is officially considered a district nominee in the board election. If no other member submits 25 valid signatures, they are deemed elected to the board with no formal election process.

If more than one member submits the required signatures, an election commences, which often includes the nominee providing biographical information, filming a candidate video, and other election-related responsibilities prior to the announcement of a winner at NCE's annual meeting in June.

Trustees running for re-election must follow this same procedure in order to continue representing their district on the board of trustees.

MEMBER DOCUMENTS

QUICK LINKS TO THE FORMS YOU MAY NEED

While the NCE board of trustees governs the cooperative on your behalf, there are still several sources of information you, as a member, should familiarize yourself with.

These documents and additional information are all housed at the cooperative's website at www.ncelec.org/membership-documents-forms, and include:

- The Annual Report
- NCE Code of Regulations
- Ethical Standards
- Mission & Vision Statements
- Our Statement of Non-Discrimination
- Landlord Agreement
- Medical Certification Form

We also encourage members to visit www.ncelec.org/transferdisconnect on our website.

OTHER NEW MEMBER RESOURCES

NCE offers its members several other opportunities to get involved, save money, and experience the cooperative difference. Most of the following opportunities are explained further on in this guide, but here are some quick links to take you directly to our website for complete details.

- www.ncelec.org/smarthub
- www.ncelec.org/acre
- www.ncelec.org/rebates-programs
- www.ncelec.org/time-day-schedule
- www.ncelec.org/co-op-connectons-savings
- www.ncelec.org/people-fund
- www.ncelec.org/capital-credits-unclaimed-funds-list

BILLING

WHAT DOES YOUR BILL SAY?

READING YOUR BILL

Your NCE electric bill is issued monthly and includes charges for the electricity service provided during the prior month. Your bill will include your total charges, last month's billing, your payment, any past due balances (if applicable), and special messages from the cooperative.

Service Detail		
Cooperative Services & Fees		
Basic Service Charge		44.00
Power Delivery Service		25.19
Security Light		8.00
kWh Tax		5.58
People Fund Contribution		0.54
Purchased Power Charges		
On Peak Generation & Transmission	265 KWH	30.92
Off Peak Generation & Transmission		66.27
Water Heater Control Discount		1.50 CR

Discounted Amount Due By 11/15/2021	\$179.00
Total Amount Due After 11/15/2021	\$189.59

*The above is an example bill for demonstration purposes and may not reflect accurate charges.

Occasionally, the cooperative will offer opportunities for members to earn or win energy credits (also referred to as bill credits). These usually come from attendance at the annual meeting, special contests being run by the cooperative, or first-time participation in certain cooperative programs or events. Keep an eye on NCE's communications channels like your *Ohio Cooperative Living* magazine, *Between the Lines* newsletter, or the cooperative's social media channels for these special opportunities.

WHAT DOES THAT CHARGE MEAN?

The exact charges that appear on your bill every month can vary depending on which rate you are assigned. However, most residential member bills include the following items.

BASIC SERVICE CHARGE

This charge appears on all member bills, and it is your cost to be connected and have 24/7 access to NCE's system. This charge allows the co-op to recoup our fixed costs - the costs we incur even if we were to sell zero kilowatt hours (kWh). These fixed costs can include maintenance to the system, equipment, and facility, bill processing, supplies, and employee compensation.

POWER DELIVERY SERVICE

The cost of delivering electricity from the substation to your home, based on the kWh consumed by the member that month.

PURCHASED POWER CHARGES

The cost of delivering electricity from the power plant to the substation, split into on peak and off peak generation, and again based on the kWh consumed that month.

KWH TAX

A tax rate per kWh determined by the state of Ohio.

DUE BY DATES

NCE lists two amounts-owed at the bottom of your electric bill. The first is the discounted amount an NCE member owes if the payment is received by the 15th of every month. If the payment is received after the 15th, the member is responsible for the second listed amount, which is slightly higher.

PEOPLE FUND CONTRIBUTION

Operation Round Up and the NCE People Fund is a voluntary program where you can choose to round up your monthly electric bill to the nearest dollar with the extra cents donating into the NCE People Fund. This money is dispersed quarterly by a separate board of trustees, also made up of volunteer NCE members, to local organizations and members in need that apply for a grant.

OTHER CHARGES OR CREDITS (CR)

Some members may see items such as a security light, ACRE contribution, energy credits, and more depending on what services they have outside of the basic electric service.

BILLING

YOUR PAYMENT OPTIONS

IN PERSON: Members can stop by the NCE office in Attica during regular business hours to pay their bill in person with one of our member service representatives. The office is open Monday-Friday, 8 a.m. to 4:30 p.m. There is also a 24-hour night deposit box available.

BY PHONE: Members can call 1-866-999-8460 to use our secure phone payment system with a Visa, MasterCard, or Discover debit or credit card, or an electronic check, with no additional fees.

U.S. MAIL: NCE provides a self addressed business envelope to all members with their monthly bill, except for those signed up for AutoPay. NCE is not responsible for payments that arrive late due to issues with the U.S. Postal Service.

PAY ONLINE WITH SMARTHUB...AND DO SO MUCH MORE!

SmartHub is NCE's secure, online account management program that not only allows members 24/7 access to view and pay their monthly bill, but also provides payment history information, bill comparisons, energy consumption graphs, and other tools to understand your energy use. The co-op recommends all members sign up for SmartHub, even if they still choose a more traditional bill payment method, because the energy data available can help track your energy use and save you money in the long run.

SmartHub is downloadable from the app store for use on smart phones and tablets, or available through a web browser on your desktop computer.

YOUR ACCOUNT

NCE offers several billing options to members, depending on their needs and preferences. The following options are only available to our residential members:

TRADITIONAL

This type of account is what most new members are accustomed to, where the charges incurred during a billing cycle is billed to you when that cycle ends. Each month, you receive that bill with a set payment due date.

AUTO PAY

Members who prefer to automatically withdraw their bill each month from a checking or savings account can switch their traditional account to auto pay. NCE will automatically draft your payment on the due date each month. Auto pay can also be set up with a credit card.

BUDGET BILLING

The variable budget billing program offered by NCE gives members a convenient way to plan their budget by leveling your electric payment each month. This is an ideal program for members with an all-electric home where winter heating bills can be two or sometimes three times higher than the spring and summer months.

The monthly budget amount is based on 12 months of consumption history; therefore, to be eligible for the variable budget program, members must have been at their current residence for at least one year and not have an outstanding balance. The budget amount could vary from month-to-month depending on the member's monthly use. There is no catch-up month with the variable budget.

To find out more about your account options, speak with an NCE member services representative by calling 419-426-3072.

CAPITAL CREDITS

GIVING BACK TO YOU

NCE is a not-for-profit corporation owned by the members it serves. That's you! Our goal isn't to earn excessive profits for investors and shareholders. Instead, our rates are set at a level to recoup the costs of operating the cooperative and to meet any debt obligations. Any revenue we collect throughout the year that's over those costs is considered margins.

What do we do with those margins? We give them back to you! Members who purchased electricity during the year that the margins are earned receive a portion of those margins. The amount you receive depends on the amount of capital you contributed to the cooperative during that year. The longer you're a member, the more you'll get back over time.

Your capital credits balance is not a cash value - it is an amount assumed you will receive over time. Capital credit accounts may be transferred, or discounted and paid out, only to estates without a surviving spouse or to inactive members with a total capital credit balance less than \$400. To close a late member's account, a death certificate and Letter of Authority must be submitted to the co-op. This is necessary to comply with federal identity theft regulations.

Being a member of the co-op is the reason you receive capital credits. Other people who are customers of investor-owned utilities, like AEP (American Electric Power) or First Energy, do not.

Members pay their electric bills, and NCE tracks how much you pay each month.

NCE covers operating expenses and debt obligations, and sets aside any leftover revenue.

If financial conditions permit, the NCE board votes to "retire" or refund, capital credits to the members.

NCE sends members their capital credits via a bill credit or check, depending on the amount of the credit.

THE PEOPLE FUND

GIVING BACK TO ONE ANOTHER

Created in 1999, the NCE People Fund has granted local organizations and individuals more than \$1 million to improve the lives of our community members throughout the cooperative's service territory.

Money for the People Fund is gathered through the Operation Round Up contribution noted on a member's electric bill. The average cost of participation is around 50 cents per month. Organizations that can apply for a grant through the People Fund include emergency services, schools, churches, and other local non-profits. Likewise, individual NCE members who may need assistance with medical bills, equipment, or other emergencies may apply.

The People Fund board of trustees, which are appointed by the NCE board of trustees, volunteer their time to review and approves these applications for assistance based on funds available. They serve three-year terms that coincide with their district's cooperative trustee, and are only eligible to serve for two consecutive terms.

The People Fund meets once a quarter in January, April, July, and October. To find out more about the People Fund, visit the cooperative's website at www.ncelec.org.

OUTAGES

WHAT TO DO IF THE LIGHTS GO OUT

NCE's top priority is to provide you with the most reliable power possible, but occasionally vehicle accidents, storms, or animals get in the way.

All outages should be reported via telephone by calling 800-426-3072. Please do not report outages via email or social media, as these channels are not monitored 24/7 and are not designed to handle this type of communications. When reporting an outage, provide your physical address and as many details about the outage as possible, including damaged equipment, downed lines, loud noises, or if your neighbors have power.

Some NCE members use essential life-sustaining medical equipment that a power outage could pose a threat to life. If you require such equipment, please contact the office. It is very important to keep our records updated concerning these needs for priority during restoration.

OUTAGE RESTORATION

During an outage, repair work is prioritized to restore power to the largest number of members first. In the rare occasion where NCE is unable to pinpoint an outage's location, crews will follow the below steps.

- 1** Repairing damage to transmission lines takes top priority during major events, as this can affect tens of thousands of members at once. Fortunately, this damage rarely occurs, and usually only in the case of tornadoes or hurricanes.
- 2** Next, NCE's distribution substations are checked for damage, which are fed by high-voltage transmission lines and serve thousands of members. Crews determine if problems stem from these lines feeding into the substation or the substation itself.
- 3** If the problem can't be isolated at the substation, crews check distribution lines, which carry power to large groups of members in our communities.
- 4** If outages remain, tap lines are checked next. These lines deliver power to transformers located outside of homes and business.
- 5** If your home remains without power after the above repairs, you service line may need repaired, which brings power directly into your home.

ELECTRICAL SAFETY

BEING VIGILANT AROUND LIVE WIRES

POWER LINE & SUBSTATION SAFETY

Always assume power lines are alive and deadly, even if they are on the ground, and never touch downed lines or anything they have come into contact with.

Be aware of the location of power lines and keep yourself and objects clear of them, like ladders or irrigation pipes. When an object comes in contact with a power line, electricity travels through it and into the person holding on, resulting in electric shock or even death. Electricity can also travel through tree limbs that come in contact with power lines, so remind children to never climb trees near power lines, or play near NCE's equipment.

Similarly, never enter a substation for any reason. The high-voltage equipment is extremely dangerous. If you see an issue at a substation, or with any of NCE's power lines, contact the cooperative immediately and a trained crew will be dispatched safely correct any issues.

CALL BEFORE YOU DIG

Prior to doing any digging, you must call 811 to identify any underground utilities located on your property. Digging without calling can lead to a widespread community outage, result in fines/repair costs, and most importantly, harm you and those around you. This free service prevents you from damaging any underground electric, gas, or other buried utilities, and helps keep you safe.

SAFETY EDUCATION

NCE is available for safety demonstrations and trainings for emergency services personnel, schools, community organizations, and other events. Utilizing both a tabletop display and a live line safety trailer, NCE personnel illustrate the effects electricity can have on various objects, including the human body.

ENERGY ADVISORS

YOUR FRIEND IN THE ENERGY WORLD

As an NCE member, you now have access to a personal energy advisor. We at the cooperative want our members to know they have access to the best energy efficiency information possible in any situation, so we employ knowledgeable energy experts who can provide tons of energy advice on a variety of topics.

Our advisors bring a range of experience and background to their jobs, and they pass that information on to co-op members through energy walkthroughs, inspections, or just a simple phone call to the office. Their goal is to make sure members are using their energy – and their money – as wisely as possible.

As a cooperative, NCE is providing electric service to you, but we also want to make sure the amount you're paying each month is reasonable, affordable, and as low as it possibly can be. It's part of what makes being a co-op member unique. This area is where our energy advisors thrive. High bill concerns make up a majority of the phone calls and questions our energy advisors receive, and they are often able to pinpoint areas in a member's home that could use some additional energy efficiency help.

PROGRAMS & REBATES

Some energy efficiency changes at your home can also lead to rebates through the cooperative, and our energy advisors can help ensure you're making the best decisions for your home while also qualifying for these offered incentives. For more information on the available rebates, visit www.ncelec.org/rebates-programs.

LOAD MANAGEMENT

PEAK ALERTS AND HOW YOU CAN SAVE

WHAT IS LOAD MANAGEMENT?

The cost of electricity increases during periods of peak demand. NCE and Buckeye Power, the wholesale power supplier for the cooperative, have used a load management system for more than 30 years to help members save energy and money during these peak periods.

Managing peak demand on the hottest and coldest days of the year helps keep electricity costs in check by temporarily shutting off devices such as water heaters, air conditioners, geothermal heating and cooling systems, and Electric Thermal Storage units. The cooperative has the ability to control these units via installable switches, at the member's request, and installation usually comes with special rate discounts for participating members.

**If you have moved into a house on NCE lines, you may have one of these switches installed already. You can call the cooperative to verify your participation status.*

Management periods occur on weekdays only and vary by season. Summer management hours typically occur between 2 p.m. and 10 p.m., and winter hours normally fall in the morning and evening. It is unlikely you will even notice when this is occurring.

WHAT ARE PEAK ALERTS?

Peak alerts are times of high demand for electricity where cooperative members are asked to delay or reduce the use of large appliances. These alerts are usually issued on the hottest and coldest days of the year. We post announcements on our social media platforms, the co-op website, and in SmartHub to notify members when a peak alert is likely to occur. Enrolling in a load management program helps NCE reduce peak power demand and saves you money during these times.

HOW CAN YOU HELP CONTROL PEAK DEMAND?

- *In the winter, lower the thermostat to 68 degrees or lower*
- *In the summer, raise the thermostat to 72 degrees or higher*
- *Turn off lights and appliances you are not currently using*
- *Delay doing laundry, running the dishwasher, or other major appliances use until the evening*
- *In the summer, take advantage of using the outdoor grill to keep cooking heat outside*

COMMUNITY

A COMMITMENT TO HOME

As your not-for profit, member-owned cooperative, NCE is proud to be so much more than your electric utility. We're a community-focused organization aimed at improving the lives of those around us. Why? Because we're a part of the community, too. Our families are living and working in the same places you are, so we're dedicated to making sure we all have the best opportunities and support possible. That's why NCE invests money each year back into our communities through donations, sponsorships, youth programs, and active participation in local events.

From local festivals and fairs to school programs and advocacy organizations, we support endeavors that support you. You'll also find that our employees and board members exemplify the co-op's commitment to community. Many of us are active in local organizations and leadership, or volunteering as a youth sports coaches, scout leaders, community event coordinators, and so much more.

Commitment. Community. Cooperative.

POLITICAL ACTION

YOUR VOICE IN ENERGY POLICY

Electricity and energy-related issues are at the forefront of today's political debate. The legislation and regulations crafted by lawmakers routinely affect electric cooperatives and their members. An electric cooperative like NCE is a unique business model. What other type of utility would return margins? Our focus is to deliver reliable, competitively priced electricity to those we serve. We don't worry about protecting out-of-town investors.

We need to do all we can to preserve the cooperative model in a business and political environment that does not always appreciate our uniqueness. Addressing these legislative issues sometimes requires more resources than NCE has. At those times, individual co-ops turn to the Action Committee for Rural Electrification (ACRE) for help.

ACRE Co-op OWNERS FOR POLITICAL ACTION

Participating in ACRE Co-op Owners for Political Action is your opportunity to support federal and state officeholders and candidates who support the positions of electric co-ops.

The cost to join ACRE starts as low as \$25 a year - only \$2.08 each month - and you can help ensure the cooperative business model thrives. It's the most effective tool we have to get and maintain the attention of our legislative decision-makers in Ohio and in Washington. Signing up is easy by visiting www.ncelec.org/acre.

VOICES FOR COOPERATIVE POWER

Members of Voices for Cooperative Power (VCP) work together to influence elected officials as they make important federal and state policy decisions that impact electric co-ops and their consumer-members. Our experiences and the ways we use energy are unique. VCP members come together to communicate this perspective and protect the ability of our co-ops to deliver affordable, reliable services to our communities.

For more information on how to share your story and voice through VCP, visit www.voicesforcooperativepower.com.

YOUTH PROGRAMS

INVESTING IN OUR FUTURE

NCE believes in recognizing the talent and potential of the youth within our service territory. As such, we coordinate and support several programs for the children of NCE members that encourage leadership and growth. Two of these programs, Ohio Cooperative Youth Day and Youth Tour to Washington, D.C., are all-expenses-paid programs offered through the cooperative.

OHIO COOPERATIVE YOUTH DAY

Each year, NCE accepts applications from high school sophomores and juniors to attend Ohio Cooperative Youth Day at the Ohio Statehouse in Columbus. On this one-day trip, students from different Ohio co-ops will have the chance to meet with their state legislators and see the government in action. Students also learn about how decisions legislators make impact the rural communities where they live.

YOUTH TOUR TO WASHINGTON, D.C.

Two students will be selected at the end of Ohio Cooperative Youth Day to represent NCE during Youth Tour to Washington, D.C. This week-long program, sponsored by the National Rural Electric Cooperatives Association, gives more than 1,500 students from across the country the opportunity to meet their U.S. Representatives and Senators in the nation's capital. Participants will also explore museums, monuments, and memorials with other Ohio students from other cooperatives.

One of the two NCE Youth Tour representatives will be selected for a paid summer internship at the cooperative. It's all part of our desire to encourage young people to learn about what makes their rural communities so valuable.

SCHOLARSHIPS

POWERING EDUCATION

Each year, NCE offers several scholarship opportunities to graduating seniors who live in the cooperative's service territory. Education plays a key role in our guiding principles, both for our members and our employees, so we believe in doing our part in contributing to the continued growth of our youth.

Applications are available for download in late November of each year. Watch *Ohio Cooperative Living* magazine and our Facebook page for additional details.

CHILDREN OF MEMBERS SCHOLARSHIP

This academic scholarship is awarded to four graduating seniors based on their academic merit, leadership roles, and community dedication each year. Two \$3,000 scholarships and two \$2,000 scholarships will be awarded following an application and interview process.

One of these scholarship winners will be selected to compete in Columbus for additional scholarship funds against other students from across the state through Ohio's Electric Cooperatives.

COOPERATIVE TRADE SCHOLARSHIP

As an electric cooperative, NCE understands how valuable trade professions are to our lives and communities, so we offer one \$500 scholarship to a graduating senior planning to pursue further education at a trade or technical school following graduation. This is a relatively new scholarship opportunity with the cooperative, and we hope to grow the program over the coming years.
